

## **PRODCOM**

### **Document for discussion**

The statistics on industrial production (PRODCOM) should help the users (i.e. enterprises in the food sector) to identify the production development and composition of the food production in the different member states and the EU in total.

For more than 20 years the output of the PRODCOM statistics for the section fish and seafood products is not of the benefit of the sector due to irrelevant grouping of fisheries products.

AIPCE-CEP has therefore proposed an amendment which complies with the structure and the basic principles of the PRODCOM list classification, namely to follow and detail further the classification of products by activity (CPA) and to maintain the correspondence with the combined nomenclature (CN).

AIPCE-CEP has followed a request of DG G.3. Business cycle, tourism and registers to provide a proposal of amendments by 27.8.2018.

Annexed, the proposed amendments.

Proposal for restructuring PRODCOM-Nomenclature (NACE 10.20 and 10.85); final version (November 2017) proposed by Bundesverband der deutschen Fischindustrie und des Fischgroßhandels e.V.

Actual	Description (in blue to be replaced)	Proposed new No.	New additional descriptions
<b>10.20.11</b>	<b>Fish fillets and other fish meat, fresh or chilled</b>
